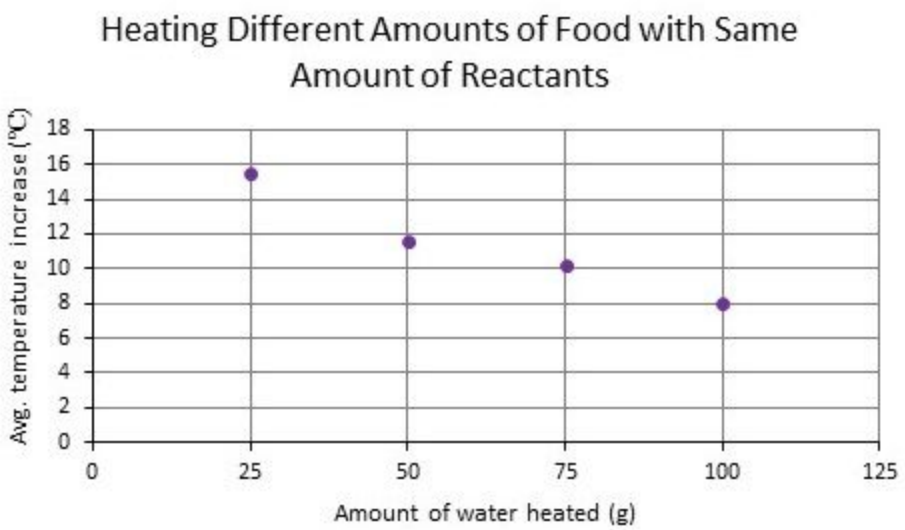
Data for Heating Different Amounts of Food

Directions: The data table and graph show the results from an investigation where different amounts of food were heated with the same amount of reactants. Draw arrows to parts of the data table and/or graph and write "What I see" (WIS) and "What it means" (WIM) notes in the space below.


Amount of water heated (g)	Average maximum temperature change (°C)
25.0	15.5
50.0	11.6
75.0	10.2
100.0	8.0
