

Name: _____

Date: _____

Landscape Stations

Part 1:

In a moment, you will visit three different stations. Each station can help us explain what might be happening in our images. As you visit each station, list the station number, what you saw happening, and what you read. If you see an image that this station might help explain, list that image number next to the information below.

Station Number:	Observations from Station	Ideas Learned from Station Reading	Landscape Image explained by this station:
Station # _____			
Station # _____			
Station # _____			

Part 2:

Find someone else that went to different stations. Share with that partner what you learned at your station and have them share what they learned with you. Record what your partner learned on here and help each other identify which image might be explained by your stations. Be ready to share with the class!

Partner's Station Number:	Partner's Observations from Station	Ideas Partner Learned from Station Reading	Landscape Image explained by this station
Station # _____			
Station # _____			
Station # _____
